EDUCATION

Bachelor of Engineering – Information Science & Engineering *Aug 2022 – Sep 2026*
Bangalore Institute of Technology, Bengaluru | CGPA: 8.4 / 10

High School (Class 10th and Class 12th) *May 2019 – May 2022*
Kendriya Vidyalaya AFS Yelahanka, Bengaluru | CBSE 10th: 89%, CBSE 12th: 80.4%

EXPERIENCE

Software Development Engineer Intern | State Street Corporation, Bengaluru (Hybrid) *Jan 2026 – Present*

- Diagnosed and resolved 10+ critical defects in a high-volume investment accounting desktop application (C++, Oracle PL/SQL, Visual Studio), reducing production incident recurrence by improving system reliability.
- Led root-cause analysis on complex production incidents involving investment ledger data; authored and deployed PL/SQL data-fix scripts that restored 100% ledger accuracy across affected accounts.
- Translated 15+ Jira functional requirements—spanning Trading Lifecycle, Equities, Bonds, and Corporate Actions—into validated code patches, accelerating sprint delivery by ~20%.

AI & Data Analyst Intern | Blue Planets Info Solutions Pvt. Ltd., Remote *Jul 2024 – Nov 2024*

- Engineered JobFitMatcher, an end-to-end AI/ML resume-screening tool (Python, spaCy, NLP, SQL) that reduced manual HR screening time by 40% by automating resume–JD matching and surfacing skill-gap insights.
- Designed and deployed interactive Streamlit dashboards (Matplotlib, Seaborn) visualizing resume–JD match scores and keyword coverage, adopted by HR teams for shortlisting decisions.
- Automated ingestion and analytics pipeline for 1,000+ resumes using Pandas, PDF parsing, and Power BI, cutting data preparation time from hours to minutes.

PROJECTS

Credit Approval System | *Python · Django · PostgreSQL · Docker · Redis · Celery* *Mar 2025 – May 2025*

- Architected a production-grade Django REST API for loan eligibility and approval, implementing dynamic credit-scoring logic against historical loan and customer data to ensure accurate, real-time decisions.
- Delivered asynchronous task processing via Celery + Redis and containerized the full stack with Docker Compose, enabling seamless horizontal scaling and one-command deployment.
- Built secure REST endpoints for customer registration, eligibility checks, and automated interest-rate correction based on score thresholds, supporting full loan lifecycle management.

Optimal Ship Routing | *JavaScript · Python · Machine Learning · Real-Time Weather API* *Jan 2025*

- Built an advanced maritime navigation system for the Indian Subcontinent that computes fuel-efficient, safety-optimized routes by integrating real-time weather data with ML-based route prediction models.
- Reduced simulated fuel cost by optimizing route selection using live meteorological inputs, demonstrating applied ML in a safety-critical, real-world geospatial domain.

PDF QA Full-Stack Application | *Python · FastAPI · LLM · RAG · No-Code Workflow Builder* *Jul 2025*

- Engineered a no-code/low-code LLM workflow platform enabling users to visually configure intelligent document pipelines—upload PDFs, ask natural-language questions, and receive AI-generated answers via a RAG architecture.
- Designed a modular component-based backend (FastAPI) supporting extensible workflow stages, reducing time-to-insight for non-technical users interacting with large document corpora.

MindWave – Mental Health Web App | *React · Redux · Node.js · Express.js · MongoDB · Material UI* *May 2024 – Jul 2024*

- Built a full-stack workplace wellness platform (React, Redux, Node.js, MongoDB) with mood tracking, EAP access, and goal milestones; integrated Google OAuth, Google Fit, and Calendly APIs for real-time health and scheduling connectivity.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Data Science Professional | Oracle University *Sep 2025*
Developer & Technology Job Simulation | Accenture (via Forage) *Oct 2023*

TECHNICAL SKILLS

Languages: Java, Python, C, C++, JavaScript, SQL (MySQL/Oracle PL/SQL), HTML, CSS
Frameworks & Libraries: React, Node.js, Express.js, Django, Flask, Streamlit, Bootstrap, Tailwind CSS, pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, NLTK, Spring, Spring Boot
Developer Tools: Git, Docker, AWS, Vercel, VS Code, Visual Studio, Jupyter Notebook, Figma, Jira, MongoDB, Power BI, MS Excel, IntelliJ Idea
Core Concepts: REST APIs, OOP, Data Structures & Algorithms, CI/CD, Agile/Scrum, NLP, Machine Learning, Database Design
