EDUCATION

Bachelor of Engineering – Information Science & Engineering

Bangalore Institute of Technology, Bengaluru | CGPA: 8.4 / 10

Aug 2022 – Sep 2026

EXPERIENCE

Software Development Engineer Intern | State Street Corporation, Bengaluru (Hybrid)

Jan 2026 – Present

- Diagnosed and resolved 10+ critical defects in a high-volume investment accounting desktop application (C++, Oracle PL/SQL), reducing production incident recurrence.
- Led root-cause analysis on production incidents involving investment ledger data; authored PL/SQL data-fix scripts restoring 100% ledger accuracy across affected accounts.
- Translated 15+ Jira functional requirements across Trading Lifecycle, Equities, Bonds, and Corporate Actions into validated code patches, accelerating sprint delivery by ~20%.

AI & Data Analyst Intern | Blue Planets Info Solutions Pvt. Ltd., Remote

Jul 2024 – Nov 2024

- Engineered JobFitMatcher, an end-to-end AI/ML resume-screening tool (Python, spaCy, NLP, SQL) that reduced manual HR screening time by 40% by automating resume-JD matching.
- Automated ingestion and analytics pipeline for 1,000+ resumes using Pandas and PDF parsing; built Streamlit dashboards (Matplotlib, Seaborn) adopted by HR teams for shortlisting.

PROJECTS

Financial Intelligence Suite | React · FastAPI · Python · Ollama (Llama 3.2) · RAG · yfinance · ML · ngrok

Apr 2026

- Built an AI-powered full-stack stock analysis platform with global real-time data (yfinance), interactive charts, 7-day ML price forecasting, and composite Buy/Hold/Sell signals (RSI + MACD + Moving Averages + ML score).
- Integrated ARIA — a RAG-powered AI analyst chatbot (Ollama Llama 3.2 via ngrok tunnel) with live screen context on stock, mutual fund, and comparison pages.
- Delivered mutual fund search (2,000+ Indian funds), SIP calculator with inflation adjustment, browser-local portfolio tracker, watchlist, and multi-stock comparison; deployed frontend on Vercel.

Credit Approval System | Python · Django · PostgreSQL · Docker · Redis · Celery

Mar 2025 – May 2025

- Architected a production-grade Django REST API for loan eligibility and approval with dynamic credit-scoring logic, asynchronous task processing via Celery + Redis, and full Docker Compose containerization.
- Built secure REST endpoints for customer registration, eligibility checks, and automated interest-rate correction, supporting full loan lifecycle management.

PDF QA Full-Stack Application | Python · FastAPI · LLM · RAG · No-Code Workflow Builder

Jul 2025

- Engineered a no-code LLM workflow platform enabling users to visually configure intelligent document pipelines — upload PDFs, ask natural-language questions, and receive AI-generated answers via RAG architecture.

Optimal Ship Routing | JavaScript · Python · Machine Learning · Real-Time Weather API

Jan 2025

- Built an advanced maritime navigation system integrating real-time weather data with ML-based route prediction to compute fuel-efficient, safety-optimized routes for the Indian Subcontinent.
- Presented and published research paper at the **6th International Conference on Recent Trends in Engineering, Technology and Management 2026**, organized by Suguna College of Engineering in collaboration with Samarkand State University, Uzbekistan.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Data Science Professional | Oracle University | Sep 2025

Developer & Technology Job Simulation | Accenture (via Forage) | Oct 2023

Paper Presentation & Publication Certificate | 6th Intl. Conference on Recent Trends in Engineering, Technology & Management 2026 | Suguna College of Engineering & Samarkand State University, Uzbekistan

TECHNICAL SKILLS

Languages: Java, Python, C, C++, JavaScript, SQL (MySQL / Oracle PL/SQL), HTML, CSS

Frameworks & Libraries: React, Node.js, Express.js, Django, Flask, FastAPI, Streamlit, Tailwind CSS, Bootstrap, pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, NLTK, Spring Boot

Developer Tools: Git, Docker, AWS, Vercel, Ollama, ngrok, VS Code, Visual Studio, Jupyter Notebook, Figma, Jira, MongoDB, Power BI

Core Concepts: REST APIs, OOP, Data Structures & Algorithms, RAG, NLP, Machine Learning, CI/CD, Agile/Scrum, Database Design
